

# Color the: **SPOTTED SEATROUT**

Spotted seatrout are found in estuaries, bays, and coastal waters. They spawn at 1-2 years old, live to be 8-9 years, and grow to a maximum of 15 pounds. Populations are localized, rarely moving very far.

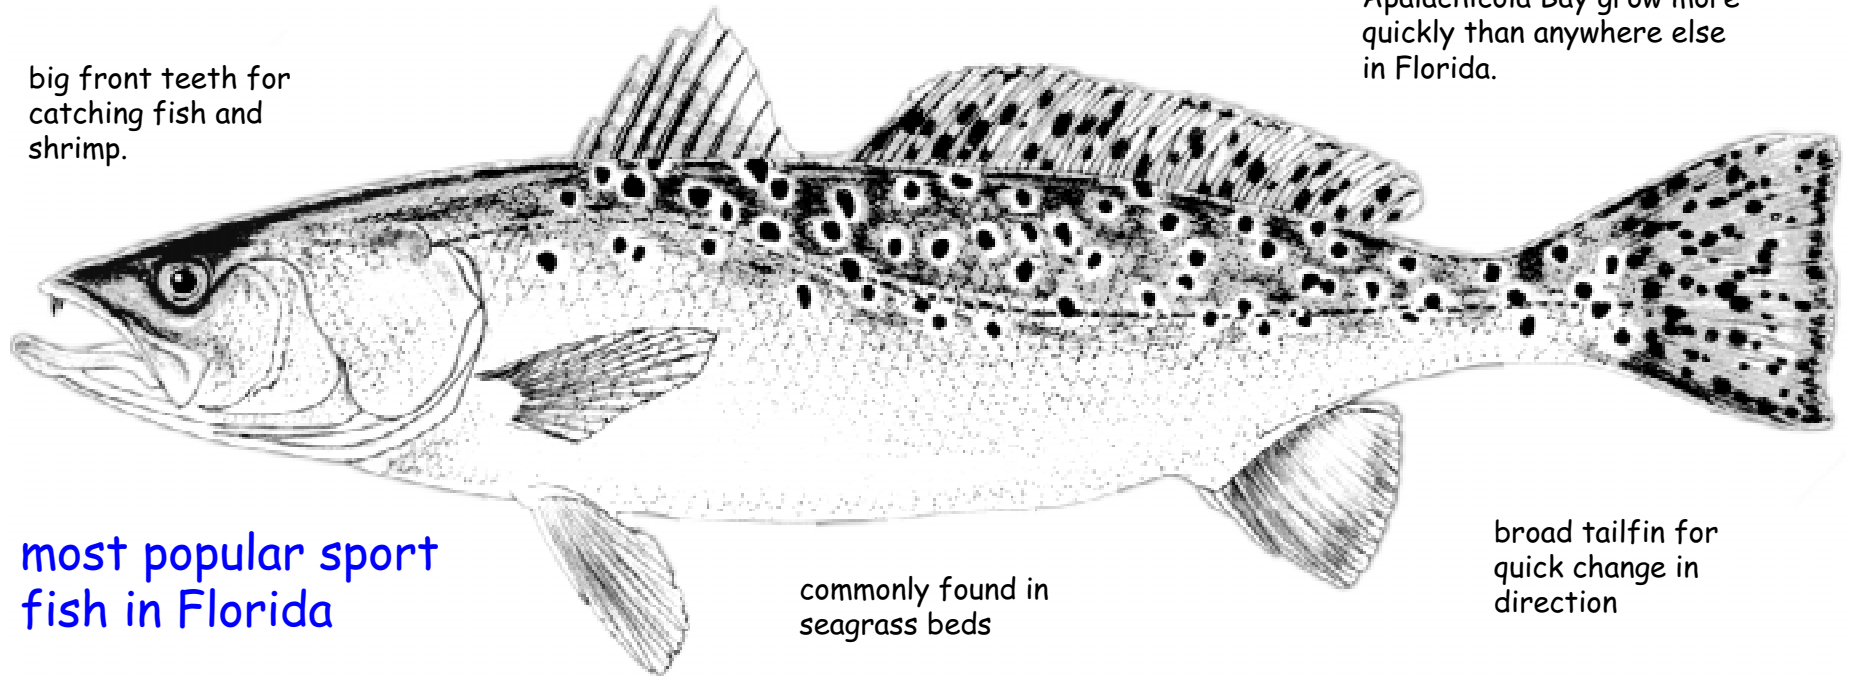

streamlined body for  
fast swimming

body color pattern  
for camouflage

spotted seatrout in the  
Indian River Lagoon and  
Apalachicola Bay grow more  
quickly than anywhere else  
in Florida.

big front teeth for  
catching fish and  
shrimp.
